

Muhammad Qasim

Software Engineering Student | Full-Stack & Mobile Developer | DevOps Engineer
aslamqasim126@gmail.com | 0326-8914320 | [linkedin.com/in/rao-qasim-005821248](https://www.linkedin.com/in/rao-qasim-005821248)

PROFESSIONAL SUMMARY

Motivated 3rd-year Software Engineering student with hands-on experience delivering real-world web, mobile, and cloud solutions for actual clients. Proven ability to manage projects end-to-end — from client requirement gathering to deployment — while collaborating effectively in team environments. Currently contributing as a DevOps engineer at Flacron Enterprise, handling enterprise cloud infrastructure across AWS, Azure, and IBM Cloud. Quick learner who thrives in both technical and cross-functional settings.

EDUCATION

B.E. Software Engineering 2023 – Present

Quaid-e-Awam University of Engineering, Science & Technology (QUEST), Nawabshah

CGPA: 3.6+ (3rd Year — Currently Enrolled)

TECHNICAL SKILLS

Programming Languages & Frameworks

- Dart / Flutter — Cross-platform mobile & desktop application development
- JavaScript / TypeScript — React, Next.js, Node.js (Express)
- PHP — Server-side scripting and backend development
- SQL — Relational database design, querying, and management

Web & CMS Development

- Full-Stack Web Development: Next.js, Node.js, React
- WordPress & WooCommerce — Business websites and e-commerce stores

DevOps & Cloud Infrastructure

- Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure, IBM Cloud
- Enterprise cloud deployment, infrastructure setup, and CI/CD pipelines
- AI API Integration: IBM WatsonX

Tools & Other

- Git & GitHub — Version control and collaborative development
- Real-world client project delivery from requirements to live deployment

MANAGEMENT & SOFT SKILLS

Leadership & Team Management

- Led and coordinated university project teams, delegating tasks and managing timelines to meet deadlines

- Organized and coordinated group events and activities, overseeing planning, logistics, and execution
- Experienced in motivating team members and maintaining collaborative work environments

Client & Stakeholder Management

- Directly managed client relationships across multiple real-world projects including Flacron Enterprise and M Hassan Traders
- Gathered and translated client requirements into working technical solutions
- Maintained ongoing communication with clients throughout development and post-deployment

Communication & Interpersonal Skills

- Strong written and verbal communication — able to explain technical concepts to non-technical clients
- Collaborative team player with experience working across both technical and non-technical teams
- Comfortable presenting ideas, project progress, and solutions to stakeholders

Learning Agility & Problem Solving

- Highly self-driven and self-taught across multiple technology stacks simultaneously
- Fast learner — independently acquired skills in DevOps, Flutter, and cloud platforms while studying full-time
- Analytical thinker with a practical approach to identifying and resolving problems under pressure

PROJECTS

Flacron GameZone Website — *Live Production Project*

Designed, developed, and deployed a fully functional gaming website for Flacron Enterprise. Managed the complete project lifecycle from client briefing and design to live cloud deployment. The site is actively used by real customers.

Live: <https://flacrongamezone.com/>

Tech Stack: Next.js · Node.js · Render deployment, Cloud Deployment (AWS / Azure)

Skill Swap Platform — *Full-Stack Web Application*

Built a web platform enabling users to list their skills and exchange them with others. Implemented user authentication, skill listing management, and a matching system. Handled full-stack development independently from database design to frontend UI.

Tech Stack: Next.js · Node.js · SQL · React

Real Estate Desktop Application — *Client Project*

Developed a custom desktop application for a local real estate seller to manage property listings, client records, and sales transactions. Replaced a manual paper-based process, improving the client's operational efficiency significantly.

Tech Stack: Desktop Application (Cross-platform)

M Hassan Traders — Shop Management App — *Flutter Client Project*

Built a Flutter mobile app for a retail shop to digitize their Khaata (credit/due ledger). Features include customer due tracking, automated payment reminder notifications, and daily transaction management — eliminating manual bookkeeping errors for the client.

Tech Stack: Flutter · Dart · Sqflite · Push Notifications

AI Document Reader & Summarizer — *Flutter + AI Integration*

Developed a Flutter mobile app that lets users upload documents and receive instant AI-generated summaries. Integrated IBM WatsonX AI API for natural language processing, demonstrating ability to work with enterprise AI services in a mobile environment.

Tech Stack: Flutter · Dart · IBM WatsonX AI API

EXPERIENCE

DevOps Engineer — Flacron Enterprise2025 – Present

Contributing as a DevOps engineer responsible for cloud infrastructure management and enterprise-level application deployments across multiple platforms.

- Deploying and managing enterprise applications on AWS, Microsoft Azure, and IBM Cloud
- Building and maintaining CI/CD pipelines for reliable, automated software delivery
- Developed and deployed the live Flacron GameZone website from scratch to production
- Collaborating with the development team to streamline deployment workflows and reduce downtime
- Managing client communication and delivering updates directly to enterprise stakeholders

Available for internships, junior roles, and project-based collaborations | Open to software & management positions
