

Muhammad Qasim

Full-Stack & Mobile Developer

aslamqasim126@gmail.com · 0326-8914320 · Nawabshah, Pakistan
github.com/MQasim47 · linkedin.com/in/rao-qasim-005821248

Full-stack and mobile developer who ships software that real people use. I build Next.js and React frontends, Node and Python backends, and Flutter apps, and I own them end to end — from requirements through to production on AWS. Third-year Software Engineering student, already delivering for paying clients.

EXPERIENCE

Full-Stack & Mobile Developer — Flacron Enterprises LLC 2025 – Present

- Build and ship full-stack web applications end to end for real clients, from requirement gathering through to live production deployment.
- Develop Flutter mobile applications, including the GameZone companion app with live HLS streaming against the existing backend.
- Own cloud deployment on AWS (ECS, RDS, ECR, Amplify) and Azure using Docker and CI/CD, including production databases, custom domains and DNS.
- Work directly with clients and stakeholders, translating business requirements into working, maintainable solutions.

Co-Founder & Full-Stack Developer — Qodex Software 2024 – Present

- Co-founded a software studio delivering web, mobile, backend and AI projects.
- Led a structured internship programme of around 24 interns across four tracks, setting up task packs, code review workflows and delivery standards.

SELECTED PROJECTS

Flacron GameZone LIVE · [flacrongamezone.com](#)

Football scores and standings platform with live HLS streaming, serving real customers. Next.js frontend, Node.js backend and PostgreSQL, deployed on AWS and Azure. Also built the companion Flutter app from scratch.
Next.js · Node.js · PostgreSQL · Flutter · AWS (ECS, RDS) · Docker

Unknot LIVE DEMO · [mqasim47.github.io/Unknot-Learn-Dev-Concepts](#)

Offline Flutter app that teaches 12 core developer concepts — DNS, HTTP, CORS, JWT, Docker, CI/CD, Big-O — through animated step-through diagrams rather than definitions, plus 9 developer tools and 3 logic games. One data-driven engine renders every diagram from JSON; every visual is hand-drawn with CustomPainter. 257 tests, and a GitHub Actions pipeline that ships the web build and a signed APK on each tagged release.
Flutter · Dart · Riverpod · go_router · CustomPainter · GitHub Actions

Archive PRIVATE RAG KNOWLEDGE PLATFORM

Self-hosted AI assistant that answers questions over an organisation's own documents while the data stays on their infrastructure. RAG pipeline on pgvector and Ollama for on-premise inference, with grounded retrieval and access controls.
Python · RAG · pgvector · Ollama · Next.js · PostgreSQL · Docker Compose

Synthect OFFLINE AI DOCUMENT INTELLIGENCE

Flutter app that processes documents on the device instead of calling cloud APIs. Extracts text from PDF, DOCX, CSV, JSON and XML, generates summaries with offline NLP, identifies topics and entities, and drafts context-aware replies.
Flutter · Dart · Offline NLP · Clean architecture

QUEST Software Engineering Department Website LIVE · [sw.quest.edu.pk](#)

Official department website with an alumni directory, research publications and course CLO/PLO modals, on a custom terminal-styled design system.
Next.js 14 · Sanity CMS · TypeScript · Vercel

M Hassan Traders IN DAILY USE

A cattle feed business was running its credit ledger on paper, which made balances hard to trust and old entries hard to find. I replaced it with an offline-first Flutter app covering customer accounts, dues, payment reminders and daily transactions.
Flutter · Dart · Sqflite

SKILLS

FRONTEND	Next.js, React, TypeScript, JavaScript, Tailwind CSS
BACKEND	Node.js, Express, REST APIs, Python, Prisma, authentication & RBAC
MOBILE	Flutter, Dart, Firebase, Supabase, Sqflite, clean architecture
DATABASES	PostgreSQL, SQL, Firebase, Supabase, Prisma
AI / LLM	RAG pipelines, pgvector, Ollama, LLM API integration
CLOUD	AWS (ECS, RDS, ECR, Amplify), Azure, Docker, CI/CD, GitHub Actions, Vercel, Git

EDUCATION

B.E. Software Engineering — QUEST, Nawabshah · CGPA 3.6+ · Third year 2023 – Present

Available for internships, junior roles and project-based work
